REKTOL GEAR 100 SAE 250

Mineral gear oils, without hypoid (EP) additives. Especially suitable for gears and axles equipped with sensitive non-ferrous metal components and "old" sealing materials. It corresponds to the Performance API GL-2. The non-ferrous and seal compatibility is comparable to API GL-1.

- highly adhesive and pressure resistant lubrication film
- outstanding oxidation stability
- excellent air release property, not foaming
- neutral towards sealing materials

The original formulation according to specification were an integral part of our sales range until the 1960s.
